PROJECTS

Title – Employee management system

Introduction -
- An employee management system is a **distributed application, developed to maintain the details** of employees working in any organization.
- This Project manages Employee information, like as which day the Employee joins the Company and which day the employee leaves the company with **all employee's personal details**.
- Added the functionality to **view, add, remove & filter out employee details**.
- It maintains the information about the personnel and officials of the employees.
